EDUCATION

Bennett University
B.Tech in Artificial Intelligence

September 2022 – September 2026
Greater Noida, India

TECHNICAL SKILLS

Full-Stack Development	Python, REST APIs, SQL, Git, CI/CD, React
iOS Development	Swift, SwiftUI, Xcode, iOS SDK, Core Data
Machine Learning	Python, Data Analysis, Feature Engineering, Deep Learning

WORK EXPERIENCE

Makoro.co
Backend / Full-Stack Developer

August 2025 – Present

- Developed and integrated REST APIs for Makoro's **Next.js**-based manufacturing ERP, enabling reliable data flows across production, inventory, dispatch, and finance modules
- Built web and iOS application experiences supporting day-to-day factory task management and operational digitization
- Designed and integrated REST APIs and data flows to keep factory workflows reliable across web and mobile applications
- Contributed to a production product used by paying customers, translating operational requirements into deployable software

McKinsey & Company
Machine Learning Intern

June 2025 – August 2025

- Developed and evaluated machine learning models on 1M+ structured records, improving forecast accuracy by 15%
- Applied supervised and unsupervised learning techniques for prediction, segmentation, and business-insight generation
- Built automated data preprocessing, and model-evaluation pipelines, reducing development cycle time by 30%
- Analyzed model performance and translated findings into actionable recommendations for non-technical stakeholders

BharatAdWheels
Co-Founder

September 2023 – May 2025
Delhi, India

- Led business development and customer acquisition for a digital out-of-home advertising platform
- Built partnerships with drivers, fleet operators, and advertisers by communicating the commercial value of the platform and negotiating pilot deployments
- Defined go-to-market strategy, pricing discussions, and customer onboarding processes to convert operational requirements into scalable service offerings

Artificial Intelligence Society, Bennett University
Technical Head

August 2024 – May 2025

- Led AI-focused workshops and technical initiatives attended by 300+ students across multiple cohorts
- Guided teams in machine learning, deep learning, contributing to a 2x increase in successful project completions
- Delivered sessions on Python, Swift, and deep learning, improving participant technical assessment scores.
- Coordinated hackathons and technical events, increasing student participation by 40% year-over-year

PROJECTS

Human Counting System
Python, OpenCV, HOG, Computer Vision

GitHub

- Built a real-time computer-vision system that detects and counts people in images and video streams using OpenCV and Histogram of Oriented Gradients descriptors
- Implemented an end-to-end detection pipeline for practical visual analytics and occupancy-monitoring use cases

iOS Apps
SwiftUI, Machine Learning

GitHub

- Built multiple iOS applications using Swift and SwiftUI with a focus on clean architecture and performance
- Developed **Skincare.ai** and **StoryTime.ai**, integrating ML-driven personalization and AI-powered content experiences
